Profession summary

Software Engineer with experience in full-stack application development using Java, Spring Boot, ReactJS, C#, .NET, MySQL, REST APIs, and Git. Proficient in designing scalable web applications, developing secure backend services, integrating databases, and customizing ERP solutions. Currently building AI-powered applications using Spring Boot, ReactJS, and OpenAI API while enhancing expertise in ERPNext and enterprise software development.

Education

P. R. Pote Patil College of Engineering Management, Amravati, BE in Computer Science and Engineering (GPA: 7.68/10) Dec 2021 – May 2024

Government Polytechnic, Khamgaon, Diploma in Computer Engineering (Percentage: 84%) Aug 2018 – Oct 2021

Technologies

Languages & Frameworks: Java, C#, Python, JavaScript, SQL, HTML/CSS, ReactJS, Spring Boot

Backend Development & Databases: RESTful API, Hibernate, MySQL

Tools & Platforms: Git, GitHub, Maven, Eclipse, Postman, VS Code, Visual Studio

Work Experiance

Software Engineer Trainee, DataVertex Technologies Pvt Ltd. Sep 2025 – Present

- Developed web applications using C# and .NET Framework.
- Implemented backend logic, form validation, and database integration.
- Customized ERP modules in Odoo to optimize workflows.
- Collaborated in agile teams and debugged code for clean delivery.

Software Developer Trainee, Aalions Infotech Pvt Ltd. April 2025 – Aug 2025

- Developed a full-stack course portal using ReactJS, Node.js, and Tailwind CSS for global and local university programs.
- Built secure REST APIs with Node.js for user authentication, enrollment, and course data management.
- Crafted responsive UI with Tailwind CSS and React Router for smooth navigation across course categories.
- Integrated smart filters & search to streamline course discovery by format, university, and subject.

Projects

AI Chatbot Application

- AI Chatbot Application | Spring Boot, React JS, OpenAI API (Ongoing) Currently developing an AI-powered chatbot application using Spring Boot, React JS, REST APIs, and OpenAI ChatGPT API, focusing on real-time communication, API integration, and responsive user experience.

Employee Managemet System

- Developed a full-stack Employee Management System using Spring Boot and ReactJS with Bootstrap CSS, enabling efficient employee data handling, role-based access control, and a responsive, interactive UI.
- Designed and implemented RESTful APIs with Spring Boot for CRUD operations, integrated with a MySQL database, and optimized performance using JPA/Hibernate.
- Integrated frontend and backend via Axios API calls for real-time data synchronization, incorporating input validation, error handling, and secure authentication using Spring Security + JWT.

- Applied best practices in modular code structure, database optimization, and version control using Git/GitHub to ensure maintainability and scalability.

Achievements

- Coordinated the Hospitality Committee during college events, managing guest relations, logistics, and smooth event execution.
- Led as Head Coordinator for the Training & Placement Cell, organizing recruitment drives, liaising with companies, and facilitating student career opportunities.

ERPNext Learning

- Learning ERPNext and Frappe Framework.
- Understanding ERP modules like HR, Sales, Purchase, Inventory, and CRM.
- Working with DocTypes, Forms, Reports, and Workflows.
